**Overview**

This sensor detects the air conditioner refrigerant pressure and optimally controls the compressor.

**Characteristics**

- **Allowable Pressure**: 0 to 8.83MPa
- **Operating Pressure**: 0 to 3.187MPa
- **Operating Temperature**: -30 to 100°C
- **Operating Voltage**: DC 5V
- **Rated Current**: 12mA Max
- **Output**: Analog Voltage
- **Application**: Air Conditioner Refrigerant

**Example of Use**

This sensor detects the air conditioner refrigerant pressure and optimally controls the compressor.
